Profile Summary

Undergraduate Software Engineering student and Full Stack Web Developer Intern with hands-on experience in the MERN stack development, RESTful APIs, and responsive UI design. Proficient in React.js, Next.js, Node.js, MongoDB, and TypeScript with experience in developing scalable web and mobile applications. Familiar with Agile development methodologies, Git-based version control and performance optimization. Actively seeking a Web Developer / Software Engineering Internship to contribute to real-world projects and enhance industry-level skills.

Core Competencies

- **Frontend Development:** React.js | Next.js | React Native | TypeScript | JavaScript | HTML | CSS | Tailwind CSS
- **Backend Development:** Node.js | Express.js | Python | C | PHP | RESTful APIs
- **Database Management:** NoSQL(MongoDB) | SQL(MySQL) | Appwrite
- **DevOps & Tools:** Git | Jira | Postman | Figma | Vercel | Cloudinary | Puter
- **Soft skills:** Problem solving | Collaborative work | Passion for learning | Attention to detail

Project Experiences

Full-Stack Spotify Clone

Technologies: **MongoDB, Express.js, React.js, Node.js (MERN), Tailwind CSS, Vercel**

- Constructed a full-stack music streaming platform using the MERN stack and Async programming for real-time data fetching, achieving a response time of under 200 ms with a scalable architecture and unified routing system for seamless navigation
- Spearheaded a high-performance admin panel that reduced content update time by 50% through a robust backend API and automated validation.

Live Demo: [Spotify-clone](#)

Admin dashboard: spotify-clone-435k.vercel.app

Full-Stack Blog Website

Technologies: **Next.js, MongoDB, Tailwind CSS, Cloudinary, RESTful API, Postman, Vercel**

- Architected a high-performance platform featuring robust server-side logic and data modeling, achieving an 84%+ Lighthouse performance score with instant SEO indexing and a seamless, responsive UI using Tailwind CSS
- Expanded the full CRUD functionality with systematized media handling via Cloudinary and an Email Subscription system, ensuring 100% API reliability through rigorous Postman testing.

Admin dashboard: [Next-blog-vercel-admin](https://next-blog-vercel-admin.vercel.app/)

AI-Powered Resume Analyzer

Technologies: **React, TypeScript, Tailwind CSS, Puter.js AI, Puter Cloud Hosting**

- Developed an AI-driven Resume Analyzer using React, TypeScript, and Puter.js, which delivers real-time ATS scoring with under 4-second latency to provide instant, actionable feedback.

GitHub: <https://github.com/Hansani2002-ab/AI-Resume-Analyzer>

Live Demo: <https://resume-ai.puter.site/>

University LMS Quiz Application

Technologies: **React.js, TypeScript, Java Spring Boot, MongoDB, REST APIs**

- Synergized in an agile team to enhance a robust quiz management system integrated with a university LMS, successfully facilitating assessments for 50+ students and ensuring seamless data synchronization.
- Designed the frontend using React and TypeScript to ensure type-safe development, implementing efficient state management to deliver a highly responsive and scalable user interface.

GitHub: <https://github.com/Hansani2002-ab/SmartMind--Quiz-Website>

Pizza ordering delivery system

Technologies: **Java, Spring Boot, Spring Security, MongoDB, React, Stripe API, Maven**

- Collaborated in a team to develop an e-commerce platform, implementing Stripe API for 100% secure payment success rates and managing complex delivery workflows for real-time tracking.
- Implemented secure authentication and authorization using Spring Security to manage complex server workflows, while integrating the Stripe API to ensure 100% secure payment processing and delivery management

GitHub: <https://github.com/Hansani2002-ab/pizza-order-delivery-system>

Live Demo: <https://redoven-client.vercel.app/>

Mobile movie app

Technologies: **React Native, TypeScript, Appwrite, TMDB API, Tailwind CSS, NativeWind, Expo**

- Initiated a cross-platform mobile application using React Native and TypeScript, integrating the TMDB API for real-time data retrieval and providing a seamless movie discovery experience.
- Enforced performance optimizations in the React Native codebase, tuning TMDB API queries to achieve under 1.5-second data retrieval for a seamless experience.
