Profile Summary

Undergraduate Software Engineering student and Full Stack Web Developer Intern with hands-on experience in MERN stack development, RESTful APIs, and responsive UI design. Proficient in React.js, Next.js, Node.js, MongoDB, and TypeScript with experience developing scalable web and mobile applications. Familiar with Agile development, Git-based version control, and performance optimization. Actively seeking a Web Developer / Software Engineering Internship to contribute to real-world projects and enhance industry-level skills.

Core Competencies

- **Frontend Development:** React.js | Next.js | React Native | TypeScript | JavaScript | HTML | CSS | Tailwind CSS
- **Backend Development:** Node.js | Express.js | Python | C | PHP | RESTful APIs
- **Database Management:** MongoDB | MySQL | Appwrite
- **DevOps & Tools:** Git | Jira | Postman | Figma | Vercel | Cloudinary | Puter

Project Experiences

Full Stack Spotify Clone

Technologies: **MongoDB, Express.js, React.js, Node.js (MERN), Tailwind CSS, Vercel**

- Developed a full-stack music streaming platform using the MERN stack, featuring a response time under 200ms and a unified routing system for seamless navigation.
- Spearheaded a high-performance Admin Panel that reduced content update time by 50% through a robust backend API and automated validation.

Live Demo: [Spotify-clone](https://spotify-clone.vercel.app/)

Admin Dashboard: spotify-clone-435k.vercel.app

Full- Stack Blog Website

Technologies: **Next.js, MongoDB, Tailwind CSS, Cloudinary, RESTful API, Postman, Vercel**

- Architected a high-performance platform achieving a 84%+ Lighthouse performance score with instant SEO indexing and a seamless, responsive UI using Tailwind CSS.
- Developed full CRUD functionality with automated media handling via Cloudinary and an Email Subscription system, ensuring 100% API reliability through rigorous Postman testing.

Live Demo: [Next-blog](https://next-blog.vercel.app/)

Admin Dashboard: [Next-blog-vercel-admin](https://next-blog-vercel-admin.vercel.app/)

AI-Powered Resume Analyzer (Resumind)

Technologies: **React, TypeScript, Tailwind CSS, Puter.js AI, Puter Cloud Hosting**

- Engineered an AI-driven Resume Analyzer using React, TypeScript, and Puter.js to deliver real-time ATS scoring and actionable feedback, deployed on Puter cloud infrastructure.

GitHub: <https://github.com/Hansani2002-ab/AI-Resume-Analyzer>

Live Demo: <https://resume-ai.puter.site/>

University LMS Quiz Application

Technologies: **React.js, TypeScript, Java Spring Boot, MongoDB, REST APIs**

- Collaborated in an agile team to develop a robust quiz management system integrated with a university LMS, successfully facilitating assessments for 50+ students and ensuring seamless data synchronization.
- Engineered the frontend using React and TypeScript to ensure type-safe development, implementing efficient state management to deliver a highly responsive and scalable user interface.

GitHub: <https://github.com/Hansani2002-ab/SmartMind--Quiz-Website>

Pizza ordering delivery system

Technologies: **Java, Spring Boot, Spring Security, MongoDB, React, Stripe API, Maven**

- Collaborated in a team to develop an e-commerce platform, implementing Stripe API for 100% secure payment processing and managing complex delivery workflows for real-time tracking.
- Integrated Stripe API for secure payment processing and implemented Spring Security to handle user authentication, authorization, and delivery management workflows.

Live Demo: <https://redoven-client.vercel.app/>

Mobile movie app

Technologies: **React Native, TypeScript, Appwrite, TMDB API, Tailwind CSS (NativeWind), Expo**

- Spearheaded a cross-platform mobile application using React Native and TypeScript, integrating the TMDB API for real-time data retrieval and providing a seamless movie discovery experience.
- Implemented secure user authentication and scalable data management using Appwrite, while architecting a highly responsive UI with NativeWind (Tailwind CSS) to ensure optimal mobile performance.
